

Synergy GFS Internship - Web Development with React

Synergy Global Financial Solutions is a company focused on providing integrated solutions to banks and financial institutions. The company is a partner of Oracle Financial Services and Software.

This year the company will partner with the university for an internship program with focus on **Front-end technologies and Web Development (JavaScript & React)**. The internship program is with **4 weeks** duration, starting on **11th of May**. The program requires onsite presence at our company facilities and does not include online version.

During the internship program, the interns will gain experience in the fintech industry. They will have the chance to work on real projects with various technologies in the web development spectrum (**React 19**, TypeScript, JavaScript (ES6+), HTML, CSS). This is a perfect opportunity to complete successfully a project within a team.

We're looking for:

- 3rd year or higher students in the fields of Informatics, Software development, Software technologies and design, Business information Technologies are welcomed as well to apply;
- English proficiency;
- Strong interest in Web Development;

You'll benefit:

- Knowledge in front-end development technologies;
- Opportunity to see full development lifecycle of an application;
- Ongoing mentorship and support;
- Dedicated appliances
- Opportunity for a permanent job

If you are interested in having your internship with Synergy, please send your CV with detailed description of your university/personal projects and short motivation letter, why you would like to be intern at Synergy, to **stanimira.dimova@synergygfs.com not later than 20th of April**.

Note that we have limited number of places available and we will be contacting only selected number of students.
